

DEPARTMENT OF HISTORY

PROGRAMME – B.A.

PROGRAMME OUTCOMES

Students will be able to learn a basic narrative of historical events in a specific region of our country and the world. they can understand background of our religion, customs institutions, administration and so on. they can understand the present existing social, political, religious and economic conditions of the people. They will be able to analyse relationship between the past and present is lively presented in the history. they can develop interests in study of history and activities relating to history like collects ancient arts, old coins and other historical materials, Participate in historical drama and historical occasions, Give speech and write articles on historical topics. It also helps to impart moral education and installs the feeling of patriotism in the heart of the pupils.

COURSE OUTCOMES

Class	Paper No. and Title	Course	Outcomes
B.A.1	1.History of India from beginning to 1206A.D.	Sources of ancient history, prehistoric period, indus valley and vedic civilization. Rise of Magadh and Maurya dynasty .Sung ,satvahan dynasty indo Greek, shak pahlav and kushan period. Gupta dynasty and it's political, social economic and cultural development. Origin of Rajput muslim attacks etc. Introduction of Chhattisgarh. Pandu, sharabhपुरi Nal and kalchuri dynasty.	Students will be able to know sources of ancient history. they will understand the development of human from uncivilized man.they can understand the political, social, economic, religious and cultural development of India from haryak dynasty to Gupta dynasty. they would also know and analyse the period of Chandragupt Maurya, Ashoka , Samudragupta and Chandragupta .they will know the idea and lessons of Buddha and Mahavir Jain. they will understand and know the reasons of foreign

DEPARTMENT OF CHEMISTRY

PROGRAMME : B.Sc.

CHEMISTRY

PROGRAMME OUTCOMES

Students will have a basic knowledge of fundamentals and application of current chemical and scientific theories, will be able to record and analyze the results of experiments, skilled in problem solving, critical thinking, will understand the central role of chemistry in our society and will become aware of the ethical behavior in issues facing chemists.

PROGRAMME SPECIFIC OUTCOMES

The purpose of the B.Sc. programme is to provide the key knowledge, base and laboratory resources to prepare students for achieving their career goals as professionals in the field of chemistry. They will be able to work as chemists and technicians in different laboratories and companies. Besides, they will be eligible for higher studies so as to become scientists and academicians.

COURSE OUTCOMES

CLASS	PAPER No. & PAPER TITLE	COURSE	OUTCOME
B.Sc. - I	1. Inorganic Chemistry	Course : Atomic Structure & Periodic Properties ; Chemical Bonding – Ionic bond ; Chemical bonding - Covalent bond ; s-Block and p-Block elements ; Chemistry of Noble Gases and Theoretical Principles in Qualitative Analysis (H ₂ S Scheme)	The course aims at making the students understanding of atomic structure, periodic table, chemical bonding and molecular geometry based on accepted models. Students are also expected to learn the physical and chemical properties of s-block and p-block elements alongwith a theoretical knowledge of salt /mixture analysis.
	2. Organic Chemistry	Course : Basics of Organic Chemistry ; Introduction to Stereochemistry; Conformational Analysis of Alkanes; Chemistry of Aliphatic Hydrocarbons; Aromatic Hydrocarbons	The course lays emphasis on fundamental concepts in organic chemistry so as to help the students to understand the mechanisms of organic reactions. Aliphatic and Aromatic hydrocarbon chemistry will help them understanding organic chemistry in coming years.
	3. Physical Chemistry	Course : Mathematical concepts for Chemists; Gaseous state ; Liquid state , Colloids and Surface chemistry; Solid State Chemistry; Chemical Kinetics and Catalysis	Students having biology background will find useful to understand basic knowledge of mathematics. This will help them in learning more difficult topics . The students are provided an insight into three states of matter – solid state , liquid state and gaseous state of matter – kinetic aspects of chemical reactions and catalysis.
	4. Practical	Semi micro Qualitative Analysis , Acid – Base Titrations , Redox Titrations , Iodo/iodimetric Titrations , Calibration , Purification of Organic Compounds, Determination of b.p & m.p. , Sublimation , Decolorisation and Crystallisation , Qualitative analysis of organic functional groups, Experiments related with Surface Tension , Viscosity , Chemical Kinetics and Colloids.	Students will learn how to identify acid and basic radicals , quantitative estimation using titration methods , identification and purification of organic compounds . They will also learn to measure physical properties of liquids and rate of reactions.
	1. Inorganic Chemistry	Course : Chemistry of Transition Series elements; Oxidation and Reduction & Co-ordination compounds; Co-ordination Chemistry; Chemistry of Lanthanide	This course is designed to impart knowledge regarding coordination compounds. In this course the students are expected to learn about the behaviour of transition and inner transition elements

Pussore, Dist.- Raigarh (C.G.)

B.Sc. - II		Elements & Actinides; Acids – Bases	and will have understanding of acids and bases.
	2. Organic Chemistry	Course : Chemistry of Organic Halides; Alcohols & Phenols; Aldehydes & Ketones; Carboxylic Acids; Organic compounds of Nitrogen	This course provides students with a detailed knowledge of the various types of organic compounds – how to prepare them and what are their reactions.
	3. Physical Chemistry	Course : Thermodynamics – I & Thermochemistry; Thermodynamics – II; Chemical equilibria & Ionic equilibria; Phase Equilibrium; Photochemistry	This course has been designed to impart an insight into the detail study of Thermodynamics. The students will be made to understand the basic principles of phase equilibria and photochemistry.
	4. Practical	Semi micro Qualitative Analysis , Volumetric analysis, Qualitative analysis of organic compounds, Experiments related with Transition temperatures , Thermochemistry , Phase Equilibria and Molecular weight determination.	In this course students will learn salt / mixture analysis , identification of organic compounds , Titrations to know the strength of the unknown solution . Besides, some physical chemistry experiments are also included.
B.Sc. - III	1. Inorganic Chemistry	Course : Metal – ligand bonding in Transition; Metal Complexes , Thermodynamic and Kinetic aspects of Metal Complexes; Magnetic properties of Transition Metal Complexes; Organometallic Chemistry; Bio-inorganic Chemistry; Hard and Soft Acids and Bases (HSAB)	In this course students will learn details of metal complexes. The students are expected to understand the numerous functions of metal ions and inorganic materials in biology.
	2. Organic Chemistry	Course : Organometallic Compounds ; Carbohydrates & fats , Oils and Detergents ; Synthetic Polymers , Synthetic Dyes; Spectroscopy – I UV & IR Spectra; NMR Spectra	Spectroscopy plays an important role in modern science. In this course students will learn important concepts and applications of IR , UV and NMR spectrum. Besides students are expected to learn carbohydrates .
	3. Physical Chemistry	Course : Elementary Quantum Mechanics – I; Elementary Quantum Mechanics – II ; Spectroscopy – I Rotational Spectra , Vibrational Spectra and Raman Spectra; Spectroscopy – II Electronic Spectra and Photochemistry; Third Law of Thermodynamics & Physical properties and Molecular Structure	This course provides students modern aspects of atomic and molecular structures – Schrodinger's wave equation and its applications to various system. This course has been designed to impart an insight into the detail study of spectroscopy – a modern tool to elucidate the structure of atoms and molecules .
	4. Practical	Synthesis Analysis , Gravimetric Analysis, Steam Distillation , Column Chromatography , Qualitative Analysis of Organic Compounds , Synthesis of Organic Compounds , Experiments related with Electrochemistry , Refractometry, Polarimetry, Molecular weight determination, Colorimetry.	This course provides students to learn applied experiments related with various industries such as quantitative estimation by gravimetric analysis , chromatography and separation and identification of organic compounds. Experiments related with physical chemistry have also been included.

DEPARTMENT OF COMMERCE

PROGRAMME : B.Com.

PROGRAMME OUTCOMES

On completion of the program:

1. Students will gain knowledge in the fundamentals of commerce and a deep understanding of all the courses undertaken.
2. They will be equipped to join the industry or setup own entities, peruse further professional and other courses.
3. They will be equipped to face upcoming challenges in the industry and business as the specializations offered expose them to practical aspects.

COURSE OUTCOME

CLASS	GROUP	PAPER	COURSE OUTCOME
B.Com. - I	Financial Account Group	Financial Account	• The learner develops the skill for recording the business transactions and for preparing the financial statements.
		Business Communication	The learner develops communication skills.
	Maths Group	Business Maths	The learner develops understanding regarding set operations matrix and Mathematics of finance, Statistical tools and their applications.
		Business Regulatory Framework	The learner develops the awareness regarding the basic legal concepts and the Indian legal environment in which the business is carried on. • The learner also develops understanding regarding the emerging legal issues in a digital networked environment. The learner acquires the conceptual knowledge of the fundamentals of the corporate accounting and the techniques of preparing the financial statements. The learner develops the basic knowledge regarding the foreign exchange services and skill to manage it.
	Economic Group	Business Economics	Develops the understanding regarding the micro and macro economic concepts and ability to apply the economic principles in business management.
		Business Environment	Develops the knowledge of National and International financial organization and their working.
Account Group	Company Account	It gives knowledge of accounting system of all types of companies.	
	Company Law	The learner develops the awareness regarding the basic legal concepts and the Indian legal environment in which the

	Cost Account Group	Cost Account	The learner develops cost consciousness by acquiring deep knowledge and understanding of cost and its elements.
		Business Management	The learner develops the basic knowledge and understanding regarding the business and management. The learner develops the understanding about the process of business management, its functions and current management practices. • The learner realizes the importance of ethics in business and also acquires the capability to develop ethical practices for effective management.
	Statistics Group	Business Statistics	Students learn about the statistical analysis.
Entrepreneurship		The learner develops the entrepreneurial skills and the ability to generate innovative business ideas in the emerging industrial scenario.	
B.Com. - III	Income Tax Group	Income Tax	The learner develops the ability to apply the principles and provisions of Income Tax Act 1961, amended up to date.
		Audit	The learner develops knowledge about auditing principles, procedures and techniques in accordance with current legal requirements and professional standards.
	Indirect Tax Group	Indirect Tax	Knowledge of GST , Excise duty – central and state government is given to learners.
		Management Accounting	The learner develops the ability to use the quantitative techniques in managerial decision making. The learner realizes the relevance of management accounting and the use of accounting and costing data for planning, controlling and decision making.
	Financial Management Group	Financial Management	The learner develops the basic knowledge and skills to manage the finance.
		Financial Market Operation	Learner will have a comprehensive knowledge of Stock market – their operations and regulations.

DEPARTMENT OF POLITICAL SCIENCE

PROGRAMME : B.A

POLITICAL SCIENCE

PROGRAM OUTCOMES

The program is organized around the combined perspectives and analytical tools of Sociology, Political Science, International Relations, and History.

Programme outcome may be summarized as :

1. To develop knowledge of theories, concepts, and research methods in humanities and social sciences.
2. To assess how global, national and regional developments affect society.
3. The Political Science degree furnishes the students with a unique multidisciplinary approach in social sciences and prepares them for further academic study and for careers in the public and the private sector.

DEPARTMENT OF ZOOLOGY

PROGRAMME : B.Sc.

ZOOLOGY

PROGRAMME OUTCOME

Zoology , branch of biology that studies the members of the animal kingdom and animal life in general. It includes both the inquiry into individual animals and their constituent parts, even to the molecular level, and the inquiry into animal populations, entire faunas, and the relationships of animals to each other, to plants, and to the nonliving environment . Though this wide range of studies results in some isolation of specialties within zoology, the conceptual integration in the contemporary study of living things that has occurred in recent years emphasizes the structural and functional unity of life rather than its diversity.

COURSE OUTCOME

CLASS	PAPER NO.AND TITEL	COURSE	OUTCOME
B.Sc.I	PAPER I Cell biology and non chordate	Understood the structure of cells and cell organelles in relation to the functional aspects and understanding of the working principles and applications of microscopes Described the composition of prokaryotic and eukaryotic cells Understood the structure and functions of chromosome; mitotic and meiotic cell divisions and their significance Came to knowing the basic concept of biosystematics and procedure in taxonomy. Described the social life and economic importance of insects. Came to know that the resemblance and evolutionary significance of larval forms of echinoderms.	Demonstrated a broad understood of animal diversity, including knowledge of the scientific classification and evolutionary relationships of major groups of animals. Recognized the relationships between structure and functions at different levels of biological organization (e.g., molecules, cells, organs, organisms, populations, and species) for the major groups of animals. Came to knowing the basic concept of biosystematics and procedure in taxonomy.
	PAPER II Chordate and embryology	Identified the taxonomic status of the entire chordates and discussed the evolutionary model of the group. Imparted the knowledge on ecology of some important fishes, amphibians reptiles, birds and mammals. Impart knowledge in comparative anatomy	Identified the taxonomic status of the entire non-chordates up to annalids and discuss the evolutionary model of the group. Understanding the morphology and functional characteristics at

		<p>and development systems of chordates. Make able to discuss some and very important phenomena in Chordates. Know about the conservation and management strategies of the chordate fauna. Understood the process of development of animals. Understood the process of organogenesis of selected organs, development of extraembryonic membrane and the nature and physiology of placenta. Came to know the inducer and inductor role in embryogenesis and knowledge about metamorphosis and the process of regeneration</p>	<p>cellular and sub-cellular (molecular) level Identified the taxonomic status of the entire non-chordates up to annalids and discuss the evolutionary model of the group. Understood the process of organogenesis of selected organs, development of extraembryonic membrane and the nature and physiology of placenta. PRACTICAL WORK Students will identify the developmental stages in frog and chick.</p>
B.Sc.II	<p>PAPER I ANATOMY AND PHYSIOLOGY</p> <p>PAPER II VERTEBRATE ENDOCRINO LOGY, REPRO DUCTIVE BIOLOGY, EVOLUTION , BEHAVIOUR AND APPLIED BIOLOGY</p>	<p>Imparted the knowledge on ecology of some important fishes, amphibians reptiles, birds and mammals. Impart knowledge in comparative anatomy and development systems of chordates. Make able to discuss some and very important phenomena in Chordates. Understood about the composition of food and mechanism of digestion absorption and assimilation. Attained knowledge of respiration and excretion and understood the mechanism of transport of gases and urine formation. Described the mechanism of circulation and composition of blood Knowledge of neuromuscular coordination and the mechanism of osmoregulation in animals and endocrine system and their function is attained.</p> <p>Gives an idea about the glands which works inside the body and secretes a chemical called hormone. Understood the menstrual cycle and the role of contraceptive in population control. How it is classified, how it works and the regulation of these hormones are discussed here. It give a clear picture of its function. Understood the menstrual cycle and the role of contraceptive in population control. Trace the Origin of life .Established theories of evolution .Correlate the theories with the evidences .Explain the genetic basis of evolution .Describe zoogeography Explain the relationship of behaviour and Cognition ,Explain Rhythmic behaviours ,Explain Social behaviours, Explain feeding and Reproductive behavior ,Describe behavior assessment, Gives knowledge of silk worm rearing ,Mulberry cultivation Pests and diseases associated with silk worm and mulberry Various process involved in silk production Understands concepts of fisheries, fishing tools and site selection Aqua culture systems, induced breeding techniques, post harvesting techniques</p>	<p>Impart knowledge in comparative anatomy and development systems of chordates Impart knowledge in comparative anatomy and development systems of chordates. Make able to discuss some and very important phenomena in Chordates. Described the mechanism of circulation and composition of blood Knowledge of neuromuscular coordination and the mechanism of osmoregulation in animals and endocrine system and their function is attained.</p> <p>The endocrine system is responsible for regulating a range of bodily functions through the release of hormones. B.Sc.III	<p>PAPER I ECOLOGY , ENVIRONME NTAL BIOLOGY, TOXICOLOGY MICROBIOL OGY AND MEDICAL BIOLOGY</p> <p>PAPER II GENETICS , CELL PHYSIOLOGY, BIOCHEMIST RY, BIOTECHNOL OGY AND BIOTECHNIQ UES</p>	<p>Understood and appreciate the environment and ecological services of life on earth. Understood the abiotic factors of environment and biogeochemical cycle and intraspecific relationships of animals. Acquired knowledge of ecosystem, food chain, energy flow and productivity and understood pond as a model ecosystem Imparted knowledge of habitat ecology, pollution and bioremediation of polluted environment Introduction to Microbiology Explain the genetic basis of evolution .Describe zoogeography Explain the relationship of behaviour and Cognition ,Explain Rhythmic behaviours ,Explain Social behaviours, Explain feeding and Reproductive behavior ,Describe behavior assessment,Describe the types and molecular structure of viruses Describe the types and structure of bacteria, Explain the phenomenon of living together and symbiosis ,Describe parasitism ,Describe the life histories of some protozoan and helminth ,Describe the life histories of arthropods ,Understanding of applied parasitology</p> <p>Understood the theories of classical genetics and blood group inheritance in man Described the genetic variation through linkage and crossing over, chromosomal aberrations and sex determination. Understood the genetic defects and inborn errors of metabolism and genetic counseling and role of inbreeding and outbreeding. Understood the molecular structure of genetic materials and understood the mechanism of gene expression and regulation character formation. Comprehended the energy source, chemical bonds and the principles of thermodynamic understood the importance of acid base balance Attained the knowledge of macromolecule such as carbohydrates, protein and fat, their types and significance. Understood the knowledge of cholesterol and its biological significance Described the enzymes, mechanism of enzyme action and factors affecting the enzyme activity Understood the types and importance of vitamins Attained knowledge the history, branches and scope of biotechnology and gene transfer technique. Understood the recombinant technology, gene integration into the vector and with host genome and creation of transgenic animals. Described the principle and applications of pH meter, centrifuge, chromatography and electrophoresis.</p>	<p>Students will understand the interrelationship between abiotic and biotic environment. Students will be able to explain the ecological principles and Wild life conservation methods Students will be able to understand the concepts in population dynamics and factors affecting the rate of population. Explain the genetic basis of evolution .Describe zoogeography Explain the relationship of behaviour and Cognition ,Explain Rhythmic behaviours ,Explain Social behaviours, Explain feeding and Reproductive behavior ,Describe behavior assessment Describe the applications of Toxicology ,Explain the mechanism of Toxicity (Xenobiotic Metablism) ,Explain organ Toxicity Explain specific responses of Toxicity: Mutagenesis Identify the classification of Toxic Substances</p> <p>Students will be able to relate the molecular basis of heredity, chromosome structure, patterns of Mendelian and Nonmendelian inheritance, evolution. Students will analyse the structure of protein and the basic steps of transcription and translation. Explained how organisms function at the level of the gene, genome, cell, tissue, organ and organ-system. Students will be able to explain the synthesis of proteins, lipids, nucleic acids, and carbohydrates and their role in metabolic pathways. Skill development for the observation of blood cells and haemin crystals. Understood the working principle and applications of physiological instruments.Described the principle and applications of pH meter, centrifuge, chromatography and electrophoresis. Students demonstrate the various chromatographic techniques for the separation of biomolecules.</p>

DEPARTMENT OF HINDI

PROGRAMME : B.A.

HINDI LITERATURE

PROGRAMME OUTCOME

हिंदी का साहित्य , हिंदी के अनेक बोलियों में रचे गए साहित्य से समृद्ध हुआ है। हिंदी भारत की राजभाषा है – इस पर हमें गर्व है। प्रत्येक भारतीय का कर्तव्य है कि वह हिंदी बोले , हिंदी लिखे , हिंदी पढ़े। आज हिंदी साहित्य का अध्ययन करने वाला विद्यार्थी साहित्य के विकास और उससे होनेवाले परिवर्तनों से परिचित हो रहे हैं।

उच्च शिक्षा के क्षेत्र में हिंदी भाषा का प्रयोग और उपयोग सिकुड़ता जा रहा है। रोजगार पाने कतार में खड़े युवाओं के लिए हिंदी का ज्ञान योग्यता सूची में महत्वपूर्ण स्थान दिला पाने में सहायक नहीं है। राष्ट्रभाषा और राजभाषा के रूप में आत्मार्पित हिंदी आनंद की आधी से अधिक शताब्दी बीत जाने के बाद भी सर्वमान्य और शक्तिमान भाषा का स्थान नहीं पा सकी है। सभी चुनौतियों का सामना करने में समर्थवान हिंदी भाषा को अपनाने , उस पर गर्व करने और उसे वैश्विक स्तर पर स्थापित करने का है।

छत्तीसगढ़ शासन ने छत्तीसगढ़ राज्य हिंदी ग्रन्थ अकादमी की स्थापना की है। ज्ञान विज्ञान , तकनीक , अनुसंधान , साहित्य कला सहित हर विषय में हिंदी भाषा में स्नातक , स्नातकोत्तर स्तरीय पाठ्य एवं सन्दर्भ पुस्तकें प्रकाशित किये गए हैं , ताकि राष्ट्रिय एवं राज्य स्तरीय सेवकों के लिए आयोजित परीक्षाओं में हिंदी माध्यम वाले परीक्षार्थियों को महत्वपूर्ण सफलताएं मिल सकें।

PROGRAMME OUTCOMES, PROGRAMME SPECIFIC OUTCOMES AND COURSE OUTCOMES

PROGRAMME OUTCOMES

(B.A. with English Literature as an Optional Subject)

- PO-1. To impart knowledge of English Language and English Literature among students.
PO-2. To enable the students to transform the knowledge of English in their day-to-day life.
PO-3. To inculcate in students that English is easy to learn like other languages so there is no need to be afraid of learning it.
PO-4. To create a rational approach among the student to face the challenges in life.
PO-5. To make them able to get success in various competition exams.

PROGRAMME SPECIFIC OUTCOMES

(B.A. with English Literature as an Optional Subject)

- On completion of the Programme the students will be able to-
- PSO-1. Use correct English language in oral as well as written form.
PSO-2. Use English language effectively in formal and informal situations.
PSO-3. Understand the importance of English that has played a crucial role in building the modern India.
PSO-4. Develop language learning skills like Listening, Speaking, Reading and Writing.
PSO-5. Develop vocabulary and communicative skills.
PSO-6. Understand the real meaning and value of intellectual discipline.
PSO-7. Understand major and minor forms of literature.
PSO-8. Understand the values of literature in life.
PSO-9. Enjoy reading Poems, Plays, Novels and Short Stories.
PSO-10. Interpret the literary works by critical analysis.
PSO-11. Understand different cultures of the times.
PSO-12. Know various genres in English literature like Indian English literature, British literature and American literature.
PSO-13. Compare literary works of the great writers and philosophers by using their logic and literary competency.
PSO-14. To be able to appear in Competitive Examinations.
PSO-15. Get jobs in Public and Private Sectors.
PSO-16. To have Teaching career in School level.
PSO-17. Inculcate the human values for one's transformation of behaviour.
PSO-18. Nurture them in Soft Skills.
PSO-19. Continue for their further education.
